## WINTER 2013/2014 FASHION SHOW SUNGLASSES

The Dior sunglasses for Winter 2013 are the utmost expression of Raf Simons' couture inspiration mixed with futuristic suggestions.

Directly from the catwalk, these exclusive sunglasses express Dior's modern elegance and savoir-faire. In a perfect match between futuristic design and feminine spirit, lightness is skillfully mixed with asymmetry, for a truly sophisticated statement.

The spectacular style of these new sunglasses is combined with a soft architectural interpretation: the shape is subtly defined by a metal frame drawing an extreme butterfly shape.

Playing with asymmetry, these sunglasses offer refined and unexpected chromatic juxtapositions.

The interplay between metal and acetate is enhanced by magnetic colours:

- Gold/matt black/matt pink with black temples and dark grey lenses
- Matt light blue/gold/matt black with black temples and blue navy lenses
- Matt black/gold/matt navy blue with white temples and dark grey lenses
- Silver/matt pink/matt white with blue temples and dark grey lenses

The creativity of the new sunglasses coupled with high quality and savoir-faire, honour Dior's timeless elegance.
